

Your trusted experts in histopathology

Wax-it Histology Services Inc. is a contract research organization that specializes in histology- and pathology-related solutions for the research community. Our highly-qualified staff have extensive experience in performing a wide-range of techniques for paraffin-, frozen-, and resin-embedded samples.

As a core outsourcing facility offering both GLP-compliant and non-GLP services, we are committed to producing consistent, high-quality results with quick turn-around times. Whether it is a small pilot project or a large scale multi-timepoint drug efficacy study, we have the expertise to surpass your expectations.

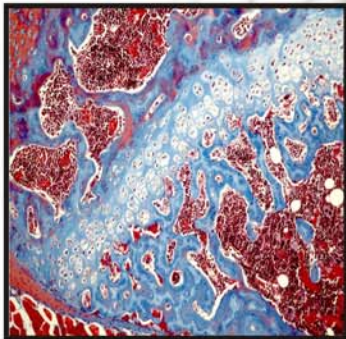

Paraffin & Frozen Sections

We have developed tissue-specific paraffin and frozen processing techniques specifically optimized in preserving maximum tissue morphology.

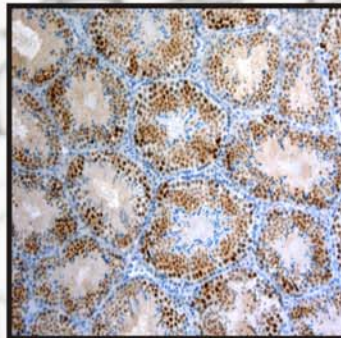

Protocol Development

Don't see a solution that addresses your specific research needs? Enquire today as our expert staff can tailor any of our techniques to your individual requirements. Whether it is antibody optimization or the development of novel staining techniques, we have the expertise and experience to help you reach your research objectives.

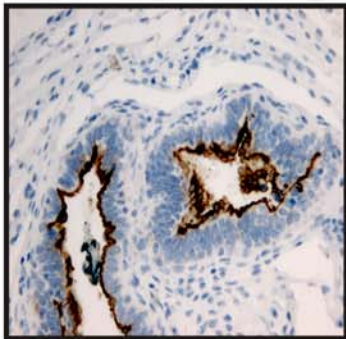

Special Stains

Our staff have extensive experience in performing a plethora of special stains such as Masson's trichrome, oil-red-o, PAS, and toluidine blue. Enquire today as many more are available.

Other Services:

Resin Sections
Knife Sharpening
Image Processing
In Situ Hybridization
Pathological Analysis

Immunostaining

Our scientists draw on years of experience to ensure accurate, reliable results are delivered on a consistent basis. We follow rigorous quality control measures to optimize and validate each antibody prior to staining.
