

# Wax-it Histology Services Inc.

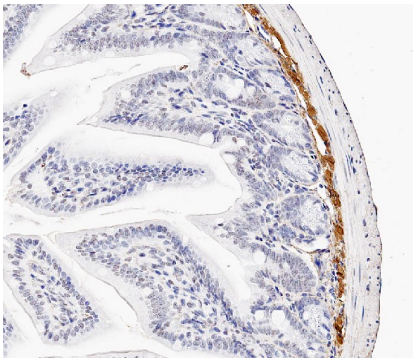

The histology department in your lab

## Model Organism Tissue Bank & Tissue MacroArray Bank

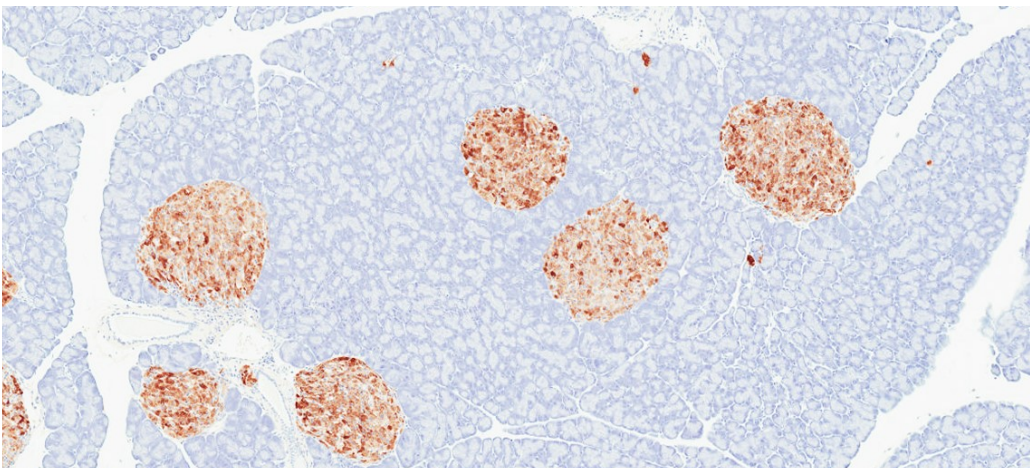

Wax-it Histology Services Inc. is a privately held, science-driven contract research organization engaged in GLP and non-GLP histology. Our Scientific staff draw on years of experiences to identify the best tissue processing protocol to ensure that you reach your research milestones.

Our Tissue Bank and Tissue MacroArray Bank is a collection of Tissue from multiple species of mouse, rat, pig, rabbit, and monkey. Custom MacroArrays can be tailored to your specific needs.

Our Tissue MacroArray allows researches to probe for protein of interest against multiple tissue on a single slide, providing a truly macroscopic view of protein distribution
