

WHO ARE WE

Wax-it Histology Services Inc. is a privately held GLP-compliant contract research organization that is committed to providing high-quality histological services to the international scientific research community. Founded in 1994, the strength of our high-quality services is in our staff. Highly qualified and experienced, our team of experts has extensive knowledge in routine histology, special stains, immunohistochemistry, protocol development, and imaging techniques.

The **Histology Lab** in Your Department

OUR FACILITY

- Full service GLP-compliant histopathology laboratory for GLP or non-GLP studies
- Secured facility to maintain confidentiality and integrity of all projects
- State-of-the-art automated equipment ensures consistent high-quality work with quick turn around times
- Dedicated GLP-compliant Quality Assurance that upholds regulatory compliancy to highest standards

OUR PEOPLE

- Highly qualified and experienced staff
- Extensive knowledge in all facets of histology and related areas
- Dedicated experts who follow strict quality control measures

OUR DEDICATION TO QUALITY

We understand the demand for excellence in turn around times and quality. Our objective is to not only meet your expectations, but to exceed them. As a core outsourcing facility, we are committed to producing consistent, high-quality work with quick turn-around times for all of our clients. Whether it is a pilot project requiring custom protocol development or a large-scale multi-timepoint drug efficacy study, each project is individually treated and undergoes the strictest of quality control measures before being presented.

INDUSTRIES WE SERVE

Pharmaceuticals

Biotechnology

Medical Devices

Universities

Hospitals

Government

OUR CAPABILITIES

Routine Histology

- Grossing & Processing
- Paraffin & Frozen(Cyro) Embedding
- Paraffin & Frozen(Cyro) Sectioning
- H&E Staining
- Special Staining

Resin Histology

- Grossing & Processing
- Resin Embedding
- Resin Sectioning
- Cutting & Grinding
- H&E Staining
- Special & IHC Staining
- Protocol Development

Immuno histochemistry

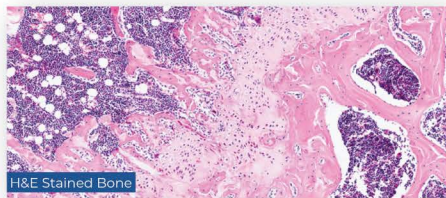

- IHC & IF Staining
- Multi-IF Staining
- Antibody Testing & Validation
- Method Development
- Antibody Cross-reactivity
- Western Immunoblot

Imaging Analysis

- Digital Whole Slide Scanning
- Staining Quantification

Pathology

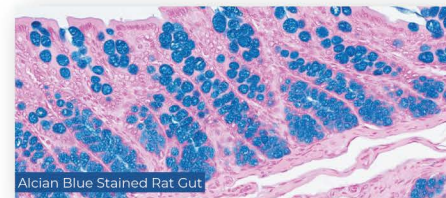

- Research Reports
- Reports for Regulatory Submissions
- Pathological Scoring & Analysis

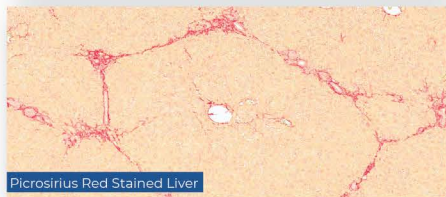

H&E Stained Bone

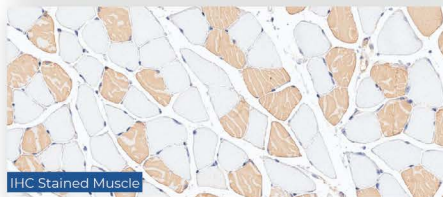

H&E Stained Artery with Metal Stent

Alcian Blue Stained Rat Gut

Picrosirius Red Stained Liver

IHC Stained Muscle

Phloroglucinol Stained Cedar
